Serial No. 10/038,062

Inventor: Stephen A. Milks Filing Date: January 4, 2002

Title: AIR CIRCULATION DEVICE

Attorney Docket No. 8416-000008

PROPOSED CLAIM FOR INTERVIEW

1. An air circulation device comprising:

a housing assembly having a front face portion, a main base

portion, and a rear face portion, the base portion having a flat motor and a fan

blade;

a rigid casing sealing the motor and associated motor bearings

creating a liquid impermeable seal enabling said air circulation device to be

subjected to liquids for cleaning said fan blades while preventing corrosion and

damage due to the liquid and said casing having a thickness covering said motor

to provide a low profile motor assembly.
